

Approximate magnification of 3/32" newsprint. **Please print these pages** to avoid any size variance that may be caused by monitor size and or settings of your computer and to gain a more accurate representation of magnifications.

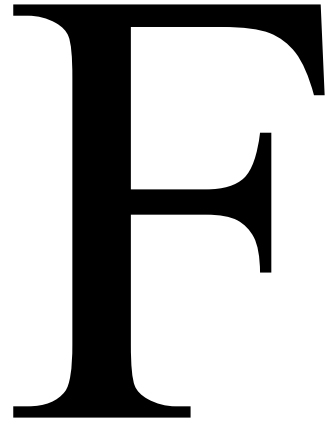

Actual Magnification may vary slightly due to slight differences in actual size of the newsprint in your newspaper or slight variances in your TV or monitor. This chart is intended to give an approximation as accurately as possible.

This chart is intended for the use of Vaughn Engineering's customers to help estimate the magnification needed to read and or as an approximate example of magnified news print. Please refer to our Magnification Chart for the estimated magnifications of different screen sizes as they relate to our products. This chart is not intended to replace the opinions and diagnosis of a doctor or professional and implies no promises or guarantees. Its intention is to help our customers make a more informed decision by demonstrating the possible size of 3/32' letters after they have been magnified. Please feel free to contact us with any questions.
